Letter of Recommendation

I am pleased to write a few words in the form of recommendation for **Name Of Student** as an applicant to your revered university. He has completed his final year project in Information Technology Engineering under my guidance.

During my coalition with him in his project named "Combining Cryptography & Steganography for secure data transfer using Java", I had the opportunity to observe him closely. This project focus on how message can be hidden behind an image using combination of Cryptography and Steganography for secure data transfer using Java. For stronger and better security this process is used. He has prepared the intricate code for the RSA algorithm and Least Significant Bit Replacement algorithm. One particular quality of his, which stands out in my memory, is his genuine quest for perfection and the level of enthusiasm, which he demonstrated towards new scientific and technical advances.

He has been an outstanding student in my classes. He presents a valuable combination of assiduity and a passionate thirst for knowledge. He is gifted with a truly analytical mind and a habit to approach a problem from different points of view and hence was able to present innovative and original solutions to the problems and assignments given to him.

Sankalp shows a temperament, which would convince anyone that he is suited for pursuing higher studies in the field of science and more importantly, he has the mental acumen to facilitate it. I highly recommend him for admission into your program with a confidence that he will excel at it. I wish him very best of luck for his bright future.

Name and Designation of Prof or Lecturer
